Cash Tromol resolution

Owner clarification is recorded as source governance evidence: opening Cash Tromol was **Rp3.853.000**; an internal liquidity exchange of **Rp1.200.000** moved value to BNI; ending Cash Tromol is **Rp2.653.000**. The BNI closing amount of **Rp123.077.312** already includes that transfer. No separate historical treasury-transfer journal is to be posted because this opening balance records only the final 27 June 2026 position.

Accounting treatment

Each final source position is recorded through Opening Balance Batch -> Opening Balance Line -> Posting Engine -> Journal -> JournalLine -> immutable Posted General Ledger. Liquidity is debited to BNI ZISWAF or Cash Tromol Yatim. The matching credit is attributed to the corresponding Fund through the net-asset opening account. Funds and Financial Accounts remain separate dimensions. Programs are intentionally not assigned because the source provides no program-level opening position.

Evidence-use constraints

This PDF is an evidence index and reconciliation certificate, not a replacement for the original workbook. The original workbook remains the source archive. The source hash above binds this evidence package to the exact supplied file. A future correction must use the governed correction workflow; it must not overwrite this posted opening balance.
